

News Portal App Synopsis

Goals and objectives:

- Build a portal that becomes a one stop source of information to users and becomes a regular part of users lives.
- A portal that has a focus on information that is relevant to local markets and in the language of the users choice.
- A portal which is customizable to the preferences and interests of users.
- The portal should provide information to users about
 - What is happening locally and across the world through news agencies and blogs
 - What is happening across the social media platforms that they use

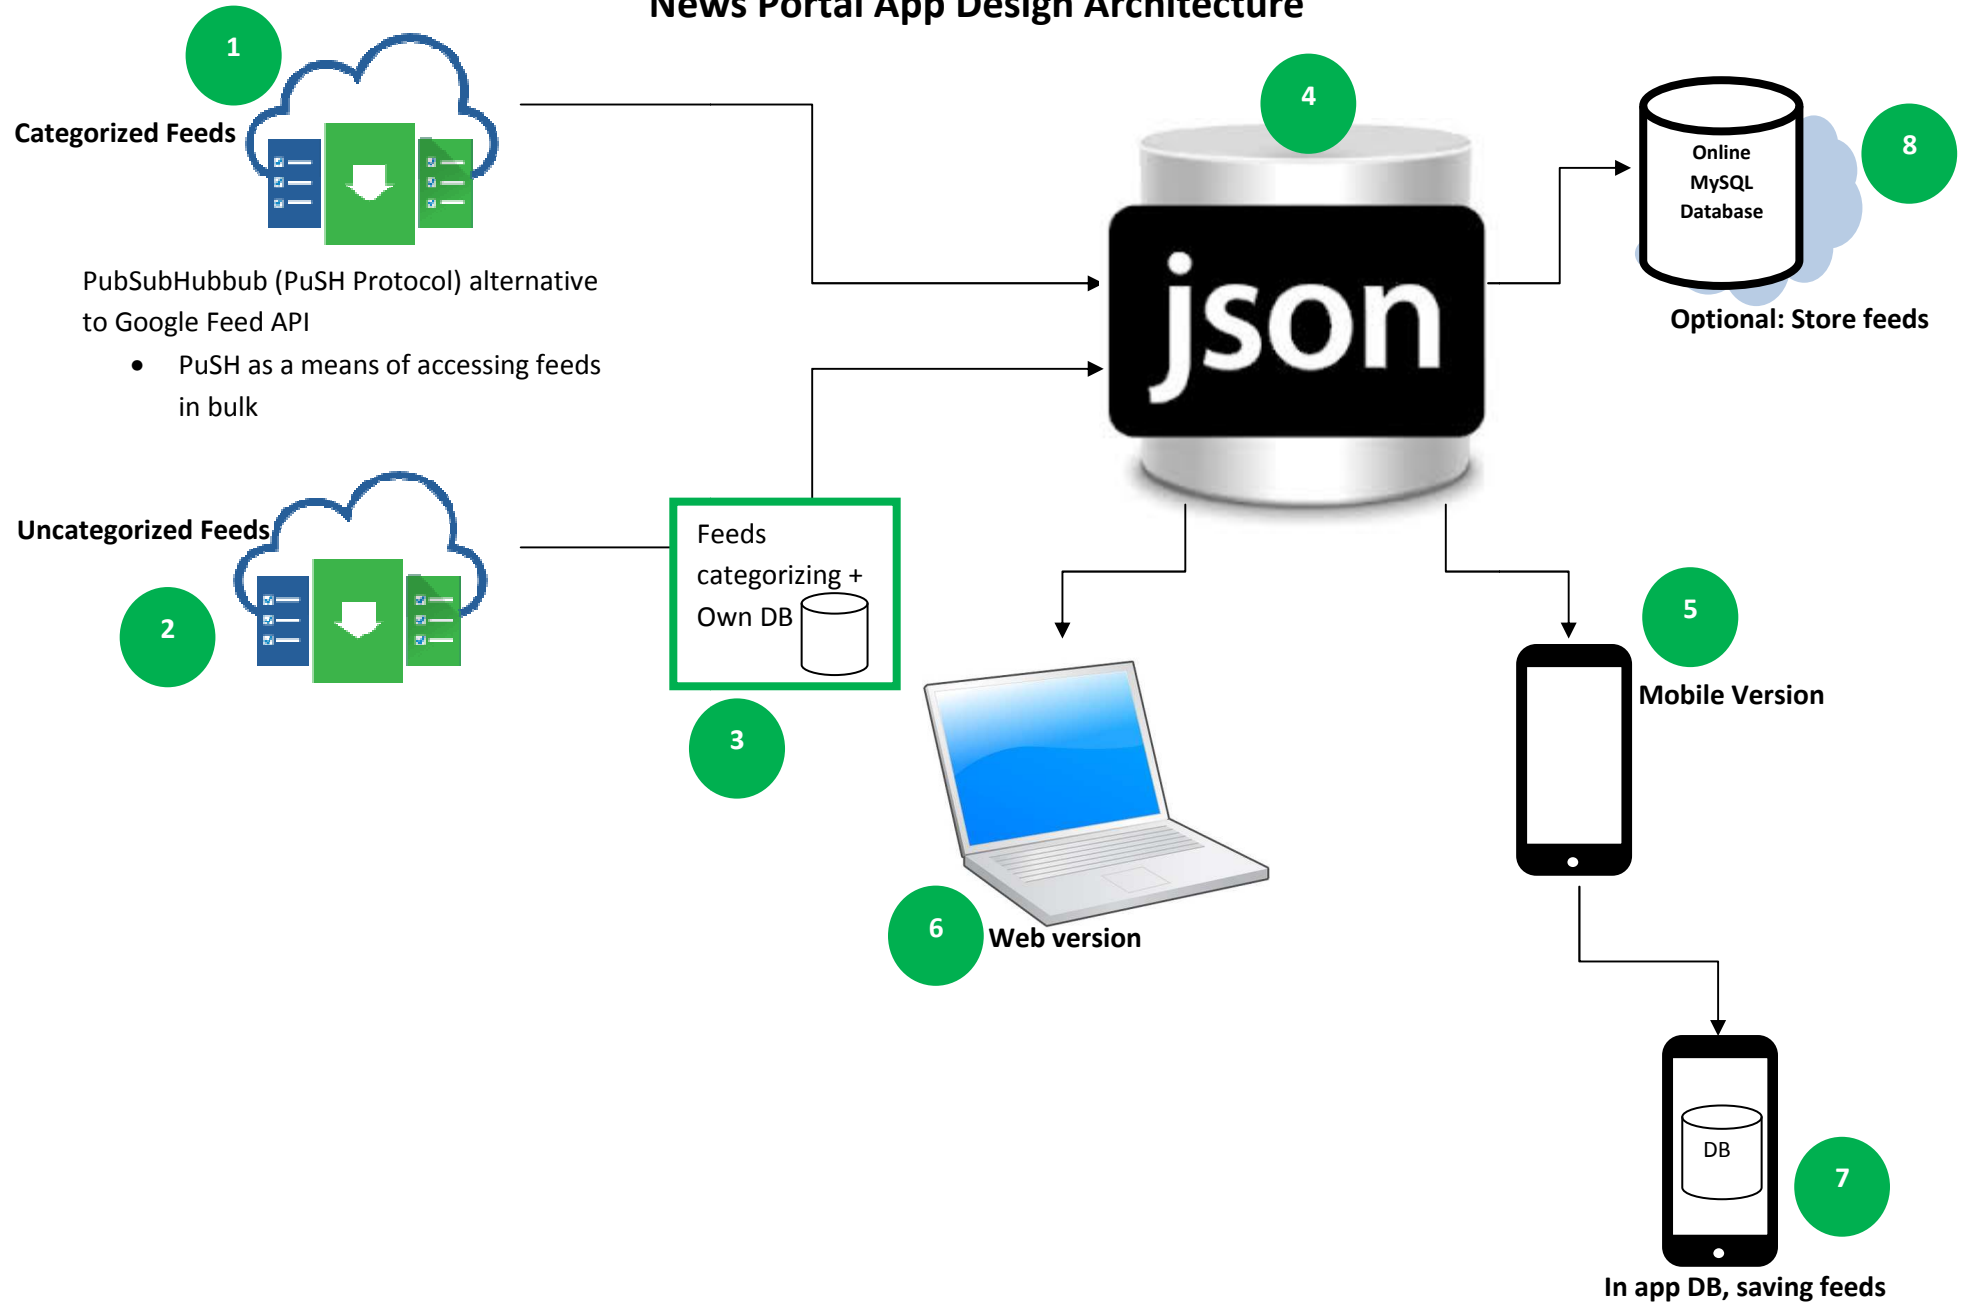

Basic Functionality

- Ability to choose and easily switch between languages
- Ability to choose and easily switch between countries
 - Tanzania
 - Kenya
 - Uganda
 - Rwanda
 - Burundi

How you would make money?

How the app will work?

News Portal App Design Architecture

1. Fetching categorized Feeds

Done by PubSubHubbub (PuSH Protocol) alternative to Google Feed API

- PuSH as a means of accessing feeds in bulk

Module Type: PuSH Protocol

Duration to complete: 3 days (8 hours per day)

Start Date:/...../2014

Complete Date:/...../2014

Module dependency: Not depending on another module can be built on its own.

Other Modules to be linked to: Module 4 - JSON web service

Skills:

Tools:

Cost: N/A

Assigned to:

Deliverable remarks:

.....

.....

2. Fetching Uncategorized Feeds

Done by PubSubHubbub (PuSH Protocol) alternative to Google Feed API

- PuSH as a means of accessing feeds in bulk

Module Type: PuSH Protocol

Duration to complete: 3 days (8 hours per day)

Start Date:/...../2014

Complete Date:/...../2014

Module dependency: Not depending on another module can be built on its own.

Other Modules to be linked to: Module 3 (Categorizing point) Module 4 - JSON web service

Skills:

Tools:

Cost: N/A

Assigned to:

Deliverable remarks:

.....
.....
.....

3. Feeds categorizing portal

- Web portal for categorizing news feed
- Human intervention

Module Type: Web portal

Duration to complete: 4 days (8 hours per day)

Start Date:/...../2014

Complete Date:/...../2014

Module dependency: Not depending on another module can be built on its own.

Other Modules to be linked to: Module 2 & Module 4 - JSON web service

Skills:

Tools:

Cost: N/A

Assigned to:

Deliverable remarks:

.....

.....

.....

4. JSON Web Services

Module Type: Web Scripts JSON [JavaScript Object Notation]

- Fetch View
- Trigger stored procedure actions
- Run queries

Duration to complete: 2 days (8 hours per day), For basic scripts. All other additional scripts can be added as needed

Start Date:/...../2014

Complete Date:/...../2014

Module dependency: Not depending on another module can be built on its own.

Other Modules to be linked to: All apps modules that need backend services

Skills: PHP, SQL,

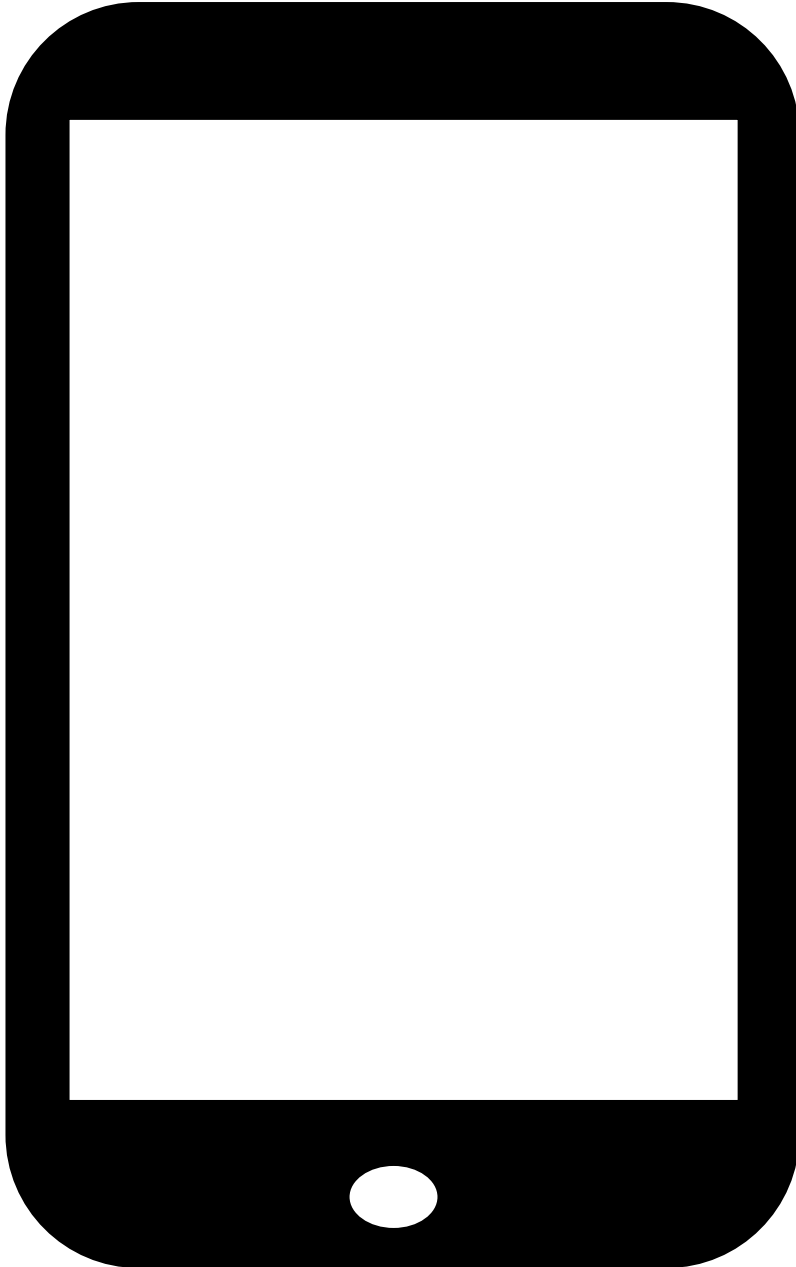

Tools: Dreamweaver / Any PHP Editor / any IDE

Cost: N/A

Assigned to:

Deliverable remarks:
.....
.....
.....

5. Mobile Version news portal

Module Type: Mobile - Android Native

Theme Style: Tab View with swipe gestures + Action Bar

Duration to complete: 10 days (8 hours per day)

Start Date:/...../2014

Complete Date:/...../2014

Module dependency: Not depending on another module
can be built on its own.

Other Modules to be linked to:

Skills: Java Android, XML, basic graphics design

Tools: Eclipse, ADT (Android Developer Tools), Photo Editor

Cost: N/A

Assigned to:

Deliverable remarks:

.....
.....
.....

6. Web version news portal

Portal to allow feeds categorization.

Module Type: Web based

Duration to complete: 3 days (8 hours per day)

Start Date:/...../2014

Complete Date:/...../2014

Module dependency: Not depending on another module
can be built on its own.

Other Modules to be linked to: Database

Skills: Php, HTML, JQuery, Javascript, css

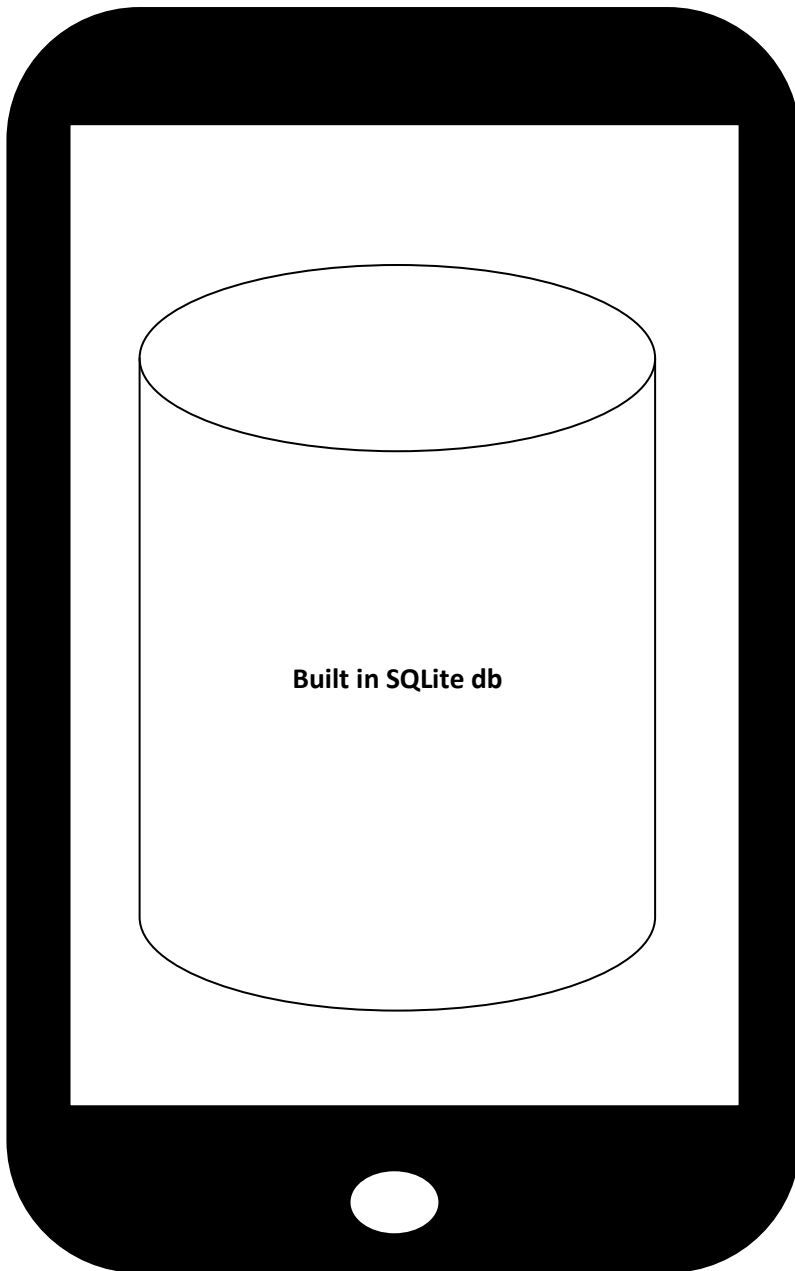

Tools: any PHP IDE

Cost: N/A

Assigned to:

Deliverable remarks:
.....
.....
.....

7. In app local db

Module Type: Mobile - Android Native

Theme Style: Inherit main app theme

Duration to complete: 7 days (8 hours per day)

Start Date:/...../2014

Complete Date:/...../2014

Module dependency: Not depending on another module
can be built on its own.

Other Modules to be linked to: Module 5

Skills: Java Android, XML, basic graphics design, SQLite

Tools: Eclipse, ADT (Android Developer Tools), Photo Editor

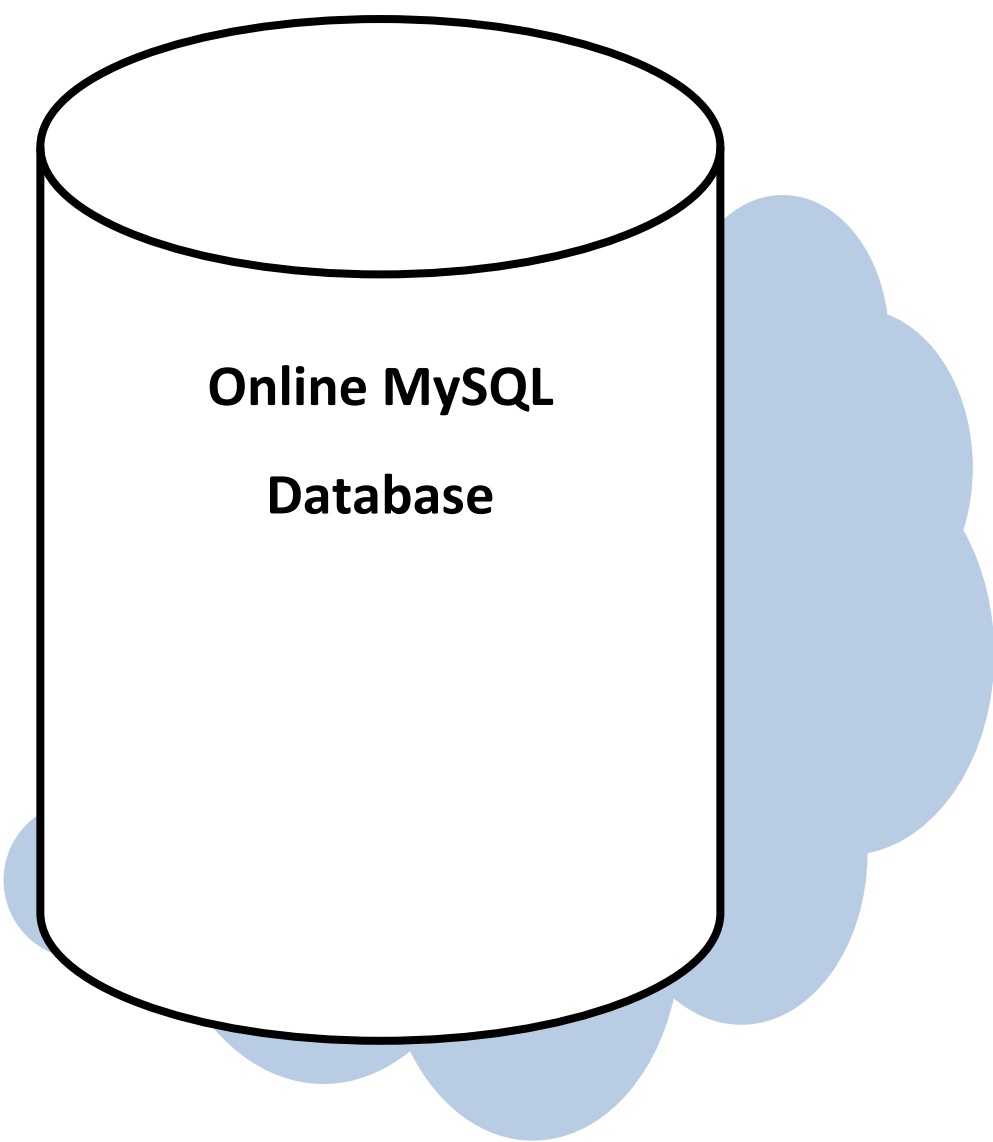

Cost: N/A

Assigned to:

Deliverable remarks:

.....
.....
.....
.....

8. Online database

**Online MySQL
Database**

Module Type: Database – MySQL database

- Stored procedures
- Views
- Tables
- Queries

Duration to complete: 2 days (8 hours per day)

Start Date:/...../2014

Complete Date:/...../2014

Module dependency: Not depending on another module
can be built on its own.

Other Modules to be linked to: Module 4

Skills: MySQL

Tools: PhpMyadmin, MySQL Console, Workbench

Cost: N/A

Assigned to:

Deliverable remarks:
